

ENABLING INNOVATION

Innovation is successful change
Projects are how we deliver it

What should I bring to class?

A laptop – once enrolled, you will be able to download the digital resources that support the day's learning; alternately, you can download and print the paper versions if you are more comfortable working with the old-school tools of the trade.

If you'd like to bring a keep-cup and/or refillable bottle, we provide all-day tea, coffee and water; and if you don't want to bring your own lunch, there are plenty of nearby food options.

PROJECTS 101

Whatever you create, you need to know how to effectively and efficiently lead a diverse and complex mix of stakeholders to successfully complete your project.

This introductory Masterclass is an ideal starting point if you need to contribute to or manage projects at work or at home, while not necessarily being a formally trained project manager.

It is also suitable if you are considering undertaking a project in the near future and are seeking to learn and apply essential project management knowledge and skills.

Why should I take this Masterclass?

What will I learn in one day?

In this one-day Masterclass you will get an introduction to the project management processes that can help optimise your performance.

You will also learn the fundamentals of the major project phases and gain the tools and resources needed to increase your focus and improve productivity.

Enrolment in this Masterclass allows you to complete the balance of your credit online in OPEN and certify as a CPO at no extra cost!

Who will be teaching me?

Our Certified Project Trainers are:

proven industry expert with over 10 years' practical experience leading complex projects, programs and portfolios of work
inspiring communicators
creative and critical thinkers, and
trained educators, facilitators and mentors.

Importantly, they are not professional lecturers who only learned project management from text-books – they superimpose on the content a wealth of project skill and experience from all stakeholder perspectives that bring project management to life.
